

ABOUT ME

Results-driven Full Stack Developer with **6 years of experience** in developing robust and scalable web applications. Proficient in front-end and back-end technologies, with a strong focus on creating intuitive user interfaces and efficient server-side functionality. Demonstrated ability to work in fast-paced environments, collaborate effectively in cross-functional teams, and deliver high-quality software solutions.

EDUCATION

Mindoro State University

- Bachelor of Science in Information Technology
- 2015-2019

CERTIFICATES

- .NET Fundamentals Concepts APIs and Libraries in the .NET Framework
- Advanced GitHub Actions
- Advanced SQL Project Design and Manage a Database
- AWS Certified Cloud Practitioner CLFC02 Cert Prep 2 Security and Compliance
- AWS Certified Cloud Practitioner CLFC02 Cert Prep 3 Cloud Technology and Services
- AWS Certified Cloud Practitioner CLFC02 Cert Prep 4 Billing Pricing And Support
- AWS Essential Training for Developers
- BackEnd Web Development with .NET
- Building RESTful APIs with Node.js and Express
- C# and .NET Essential Training
- Learning Docker
- Learning Kubernetes
- Node.js Essential Training
- Node.js Web Servers Tests and Deployment
- NoSQL Data Modeling Essential Training
- PHP Essential Training
- Practical GitHub Project Management and Collaboration
- React Essential Training
- SQL for Data Analysis
- TypeScript Essential Training
- TypeScript for JavaScript Developers
- Vue.js 3 Essential Training

Kirby A. Hipona

Full Stack Developer/ Web Designer

PROFESSIONAL EXPERIENCE

Clickistry

Full-stack Developer (Project Based) | 2026

- Designed and developed a responsive company website from concept to deployment.
- Integrated booking systems, AI chatbots, and third-party SaaS solutions.
- Developed an automated Project Budget Estimator to streamline client inquiries.
- Configured business email services and email deliverability (SMTP, DNS, SPF, DKIM, and DMARC).
- Managed server deployment, hosting configuration, cPanel administration, and Cloudflare optimization.
- Implemented SEO, performance optimization, security, and Git-based deployment workflows.

Prime Holistic Care

Full-stack Developer (Project Based) | Nov 2025 - Jan 2026

- Developed and customized a fully dynamic, responsive website with a scalable CMS for content management.
- Built an interactive front end using Alpine.js, ensuring accessibility, performance, and mobile responsiveness.
- Engineered a robust back-end CMS with Laravel and MySQL to enable non-technical administrators to manage site content.
- Integrated RESTful APIs and optimized database queries to enhance system performance and efficiency.
- Deployed and managed infrastructure on Web Hosting, utilizing Cloudflare for security, caching, and performance optimization.
- Configured hosting environments and deployment workflows via cPanel and Git-based version control.
- Implemented SEO best practices to improve search rankings, page speed, and overall visibility.
- Delivered the project independently from design to deployment, meeting both technical and business requirements.

Tri7 Solutions Inc. Ltd.

Web Developer (Full-time Remote) | 2023 - 2025

- Led development of large-scale web platforms, including Playme Movies and Olemovies, designed for performance, scalability, and user engagement.
- Architected and built full-stack applications using Laravel, CodeIgniter, Vue.js, React.js, and Next.js.
- Designed dynamic and classic UI experiences tailored to different audiences, improving user retention and advertiser interest.
- Developed interactive systems such as promo games, scratch card events, and a full Players Rewards platform with CMS and analytics dashboard.
- Built and optimized REST APIs, GraphQL services, and database systems using MySQL, and NoSQL technologies.
- Ensured high performance, security, and scalability through efficient coding practices and cloud deployment on AWS with Cloudflare optimization.
- Managed version control, deployments, and hosting environments using Git, GitHub, and cPanel.
- Applied SEO and performance optimization strategies to increase traffic, engagement, and platform reliability.
- Delivered multiple end-to-end projects independently, contributing to company growth and product innovation.

Suzuki Philippines Inc.

Web and System Developer / Programmer (Full-time) | 2021 - 2023

- Developed and maintained enterprise applications in an Agile Scrum environment using C#, .NET, Java, VB, PHP, and React.js.
- Built and enhanced internal business systems including Dealer Management System (DMS), Web-Based Bundy, HR Dashboard, Export System, and automated reporting tools.
- Designed and implemented the Online SOA system to monitor dealer balances, orders, payments, and memos with real-time dashboards.
- Created an Online Price Checker tool enabling support teams to quickly retrieve spare parts pricing data.
- Developed secure REST API integrations connecting multiple internal databases and enterprise services.
- Managed and optimized Microsoft server infrastructure to ensure system stability, security, and performance.
- Worked with MSSQL and MySQL to design efficient database structures and improve query performance.
- Collaborated cross-functionally with departments to deliver scalable solutions that streamlined workflows and improved operational efficiency.
- Utilized Git/GitHub for version control and deployment management across projects.

Kirbss I.T Solutions

Full Stack Developer (Contract) | 2020-2021

- Designed and developed kirbss.com with fully responsive layouts using modern HTML, CSS, and JavaScript standards.
- Built full-stack web applications using Laravel, CodeIgniter, PHP, Vue.js, React.js, and Next.js.
- Integrated CRM functionalities to support client management, communication, and workflow automation.
- Developed and deployed scalable backend systems with REST APIs, MySQL, MongoDB, and GraphQL.
- Implemented performance, caching, and security optimizations using Cloudflare, and cPanel.
- Created high-converting landing pages and optimized site architecture for SEO and user engagement.
- Designed and launched NFTPRENUER and Dappchain platforms focused on cryptocurrency and blockchain solutions.
- Delivered modern Web3-ready platforms demonstrating strong capability in high-performance, scalable application development.
- Managed version control, collaboration, and deployments using Git and GitHub.

Amanoma Gaming

Full-stack Developer (Project Based) | 2019 -2020

- Developed and deployed a Windows desktop game client using Visual Basic with real-time gameplay interaction and API-driven backend communication.
- Engineered secure authentication, session handling, and live data synchronization for seamless player experience.
- Built a web-based gaming platform using PHP and CodeIgniter with dynamic front-end components in React.js, HTML, CSS, and JavaScript.
- Designed and implemented a custom CMS for administrators to manage players, game settings, and transactions efficiently.
- Integrated systems through RESTful APIs to ensure synchronized data between desktop and web platforms.
- Managed relational databases using MySQL/MS SQL to maintain data integrity and performance.
- Delivered a unified gaming ecosystem that improved platform stability, operational control, and user engagement.
- Collaborated with stakeholders to translate technical requirements into scalable full-stack solutions.

MTEQ Business Solutions

ASP .Net Developer (Project Based) | 2019

- Developed a full-featured e-commerce platform using ASP.NET and C#, including product catalog, cart system, and order processing modules.
- Integrated secure payment gateway solutions to ensure safe online transactions.
- Collaborated directly with clients to gather requirements and translate business needs into technical specifications.
- Built responsive UI components using HTML, CSS, JavaScript, and React.js for a smooth user experience.
- Designed and consumed RESTful APIs to connect front-end features with backend services.
- Optimized application performance, database queries, and system scalability using MSSQL.
- Maintained clean, structured, and maintainable code following best development practices.
- Strengthened expertise in ASP.NET architecture, C#, and scalable web application development.

CORE SKILLS & EXPERTISE

- Full-stack development: Laravel, PHP, JavaScript, React, Vue
- Backend & frontend architecture with strong UI/UX design focus
- RESTful APIs & microservices (secure, scalable, high-performance)
- Advanced SQL (schema design, joins, indexing, query optimization)
- NoSQL & JSON architectures (MongoDB)
- Third-party API & GraphQL integrations
- AWS cloud deployment & scaling (EC2, S3, RDS, CloudFront, IAM)
- Server management (Linux, deployment, monitoring, security hardening)
- DevOps & CI/CD pipelines (Docker, GitHub Actions)
- Legacy system optimization and modernization
- Clean, maintainable code following best practices and design patterns
- Independent, end-to-end project ownership
- Cross-functional collaboration with QA and product teams
- Working proficiency in C# and Java
- Highly adaptable to new technologies and platforms
- Mentorship, code reviews, and technical leadership

TECH STACK

Back End	Front End	Databases	Technical Tools & Skills
• Node.js • Express.js • PHP ◦ Laravel ◦ CodeIgniter • ASP .Net (C#,VB) ◦ MVC ◦ Core • Java • Python	• React ◦ Typescript ◦ Javascript • Next JS • Vue JS • Flutter • React Native • JQuery • Javascript • HTML5 • CSS3 • Bootstrap • Tailwind	• MySql • MSSQL • NoSQL • SQLite • PostgreSQL • GraphQL • MongoDB • AWS	• Git • GitHub • Docker • Cloudflare • SEO Tools • DevOps • A/B testing • CI/CD • Saas • AI Integration/Development
CMS • Wordpress			Design Tools • Adobe Photoshop • Adobe Illustrator • Figma
